INTRODUCTION

The *National Directory of Drug Abuse and Alcoholism Treatment and Prevention Programs* is a listing of Federal, State, local, and private providers of alcoholism and drug abuse treatment and prevention services. Only providers recognized by their State substance abuse agency are listed in the *Directory*. Information in this *Directory* was obtained from the 1996 Uniform Facility Data Set (UFDS) survey conducted by the Office of Applied Studies (OAS), Substance Abuse and Mental Health Services Administration (SAMHSA). Provider information is as of October 1, 1996, the point prevalence date of the survey.

The *Directory* serves as a resource for program managers, treatment personnel, researchers, and others wanting to know the location and selected characteristics of substance abuse service providers. We have included listings for each treatment location that responded to the UFDS survey. However, some providers respond at the administrative or program level. When this occurs, the only provider that appears in the *Directory* is the program-level reporter.

In addition to alcoholism and drug abuse treatment and prevention service providers, the *Directory* contains listings of State authorities and State prevention contacts. Programs administered by the Department of Veterans Affairs, the Indian Health Service, and the Department of Defense are also included. Within each State, all providers, including the Federal programs, are alphabetized by county, city within that county, and facility name within each city. Each facility listing consists of the facility name, address, telephone number, hotline number (if applicable), and codes for types of services provided, facility location, and third party payments. These codes are defined in a key that is printed on page v.

To obtain copies of other UFDS products, as well as other Office of Applied Studies publications, complete and mail the form located at the back of this *Directory*. Treatment, prevention, or other service providers not listed in this *Directory* can be included in future surveys by completing the "Substance Abuse Facility Registration/Change Request" at the back of this *Directory* and returning it to the indicated address.

Publications Series**

National Household Survey on Drug Abuse Series:

Reports in the Household Survey Series present information from SAMHSA's National Household Survey on Drug Abuse. This representative survey is the primary source of information on the prevalence, patterns, and consequences of drug and alcohol use and abuse in the general U.S. civilian non-institutionalized population, age 12 and older. This survey has been conducted every one to three years since 1971. Standard publications in the Household Survey Series include: *Population Estimates, Main Findings, and Preliminary Data Reports.*

Drug Abuse Warning Network (DAWN) Series:

Reports in the DAWN Series provide data on the number and characteristics of (1) drug abuse related visits to a national representative sample of hospital emergency departments, and (2) drug abuse related deaths from selected medical examiner offices in the DAWN system. The medical examiner cases are not from a national representative sample. DAWN is an ongoing data system that began in the early 1970s.

Drug and Alcohol Services Information System Series:

Reports in the Services Series provide national and state level data on (1) the characteristics of specialty treatment facilities providing drug and alcohol services and (2) the number and types of patients treated. The Services Series also includes the National Directory of Drug Abuse and Alcoholism Treatment and Prevention Programs. The publications in this Series are based on SAMHSA's Drug and Alcohol Services Information System (DASIS).

Analytic Series:

Reports in the Analytic Series address special topics relating to alcohol, drug abuse, and mental health. The Analytic Series generally provides outcome and other special studies, secondary analysis of multiple data sources, and more in-depth analysis of the data presented in the standard annual reports in the other Office of Applied Studies publication series.

Methodology Series:

Reports in the Methodology Series address methodological issues concerning data collection systems conducted by SAMHSA's Office of Applied Studies. These reports include studies of new statistical techniques and theories, survey methods, sample design, survey instrument design, and objective evaluations of the reliability of collected data.
